

BELLIS-JONES HILL APPOINTED AS A QLIKVIEW ELITE PARTNER

London based Bellis Jones Hill has been appointed as an Elite partner by specialist BI supplier QlikTech UK

QlikTech MD, Sean Farrington said “We recognise exceptional performance and Bellis Jones-Hill’s recognition as an Elite Partner is a testament to a strong and effective working partnership. This is a hard-won accreditation and Bellis Jones-Hill are one of only 3 Elite Partners for us covering the UK and Ireland and one of only 20 out of 800 Partners Worldwide.”

Bellis-Jones Hill is a leading authority in Corporate Performance Management Consulting and Software with an enviable client list and an unrivalled implementation track record stretching back over 20 years.

The business provides four main performance management solutions: Healthcare Management, Corporate Performance Management, Business Intelligence and Pricing and has grown considerably over the last two to three years. This growth is largely due to its ability to continually adapt its performance management skills and solutions to address developing performance related issues in different market sectors.

Clients include: Barclays, BFI, Care Quality Commission, Environment Agency, Experian, Reuters, RSA, Skandia Life and over 20 NHS Trusts

Bellis-Jones Hill Group Chief Executive Officer, Neena Vivash said, “we’re delighted to be an Elite Partner. It reflects a lot of hard work from our BI team in quite a short space of time. We wanted to become QlikView experts as soon as possible and this appointment is a recognition of us achieving that key business objective”

About QlikView

QlikView is the only Business Intelligence solution that:

- Can be deployed in days or a few weeks (depending on project scope) to provide fast time to value.
- Puts the power of real-time, interactive dashboards and reporting in the hands of end users, without having to rely on IT.
- Provides simple point and click data visualization that delivers the big picture and detailed business analysis.
- Scales to meet every business need, from single users to the largest global enterprises.
- Offers flexible deployment possibilities, including mobile, cloud, laptop, and on-premise accessibility.
